## Associate Director — Data Analytics/Visualization & AI

nivethaj14@gmail.com | +91 99620 17614 | [Linkedin](#) | [Portfolio](#)

### PROFESSIONAL SUMMARY

Associate Director with 12+ years of experience designing AI-powered data analytics solutions that drive measurable business outcomes. Proven expertise in data governance, ETL/ELT pipeline design, and cloud analytics — leading cross-functional teams of 24 engineers and analysts to deliver scalable Snowflake-based dashboards, AI-augmented reporting, and clinical analytics platforms. Achieved a 50% reduction in development timelines through unified data model architecture and a 40% dashboard performance improvement. Strong strategic planning and stakeholder management track record across clinical operations, commercial teams, and executive leadership. Seeking leadership roles in Healthcare, Pharma, or SaaS analytics.

### WORK EXPERIENCE

#### Associate Director — Data & AI

July 2021 — Present

Syneos Health · Remote, India

- › Lead 24 engineers & analysts delivering AI-powered analytics on Snowflake, Cortex AI & Power BI — achieving **40% dashboard performance improvement** driving executive decision-making across clinical, commercial, and HR functions
- › Designed a unified Snowflake star schema data model for multi-client & multi-product architecture — reducing development timeline by **50%** and enabling new client onboarding with zero rework
- › Lead full Agile Scrum delivery and cross-functional stakeholder management — translating complex requirements into scalable analytics solutions while mentoring the team on Snowflake, Cortex AI, and best practices

#### Career Break — Marriage & Maternity

March 2017 — May 2020

Personal — India

- › Deliberate career break for family — remained engaged with data analytics field through self-directed learning

#### Senior Business Analyst

May 2020 — July 2021

Kyyba India Pvt Ltd · Remote, India

- › Converted HTML reports to Jasper Reports, led requirements analysis for RFEs, resolved data quality issues, and designed UI/UX mockups in Adobe XD — improving reporting delivery time and user experience

#### Product Specialist

August 2011 — March 2017

Cognizant Technology Solutions · Chennai, India

- › Led design, build, and enhancement of healthcare payer solutions across membership, claims, and benefits modules for multiple US clients — managing defect resolution and improving operational efficiency

### SKILLS & TOOLS

|            |                                                                                                                                                                                                                                     |
|------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

KEY PROCESS IMPROVEMENTS & IMPACT

|                                       |                                                                                                       |
|---------------------------------------|-------------------------------------------------------------------------------------------------------|
| 50% reduction in development timeline | Unified Snowflake star schema data model — multi-client & multi-product architecture, zero rework     |
| 40% dashboard performance improvement | Redesigned Power BI dashboards — enhanced UX, faster load, increased executive adoption               |
| 30% reduction in repetitive errors    | Quarterly defect review process identifying root causes and preventive actions                        |
| Zero mock-data rework                 | Streamlit + Cortex AI real-data prototyping — stakeholder KPI validation before production build      |
| Configurable KPI framework            | Reusable KPI logic adopted across multiple clients — table-level config only, zero engineering rework |
| Configurable Time Period Filters      | Table-driven filters requiring zero code changes — Live Demo: nivethaj14.github.io/time-period-filter |

CERTIFICATIONS & EDUCATION

|                                                             |                        |
|-------------------------------------------------------------|------------------------|
| ◆ ORACLE Certified SQL Expert (OCA)                         | Oracle · 2014          |
| ◆ Master Certification in Data Science                      | Simplilearn · 2020     |
| ◆ AHM 250 — Introduction to Healthcare                      | AHIP · 2012            |
| ◆ BE Electronics & Communication Engineering — 80%, Top 10% | Anna University · 2011 |

AWARDS & RECOGNITION

|                             |                                                                       |
|-----------------------------|-----------------------------------------------------------------------|
| Exceptional Performer       | Latest appraisal cycle — highest performance rating · Syneos Health   |
| Consistent Strong Performer | Multiple consecutive appraisal cycles · Syneos Health                 |
| Best BI Visualization Idea  | Cash prize of Rs.10,000 for outstanding data visualization concept    |
| Associate of the Quarter    | Q4 2016 · Cognizant Technology Solutions · Client delivery excellence |
